

COST Action TU1103

# Operation & safety of tramways in interaction with public space

© Arnaud Bouissou/MEDDE-MLETR

2011 | 2015

## Objectives of the Action:

- to improve tram safety, through a better management of their insertion in urban space,
- to minimize tram accidents and their impact on both transport system and society,
- to enhance a better understanding of problems, a shared feedback,
- to propose some practical answers to identified issues for all actors.

The final conference will take place

**on September 29th 2015 at Frankfurt, Germany.**

Conference is co-located with European Transport Conference 2015.

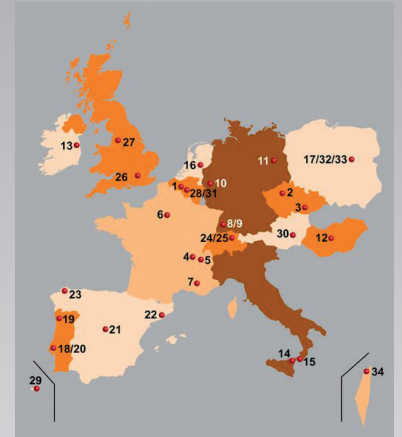

## Highlights of the programme:

- Collection and use of safety data
  - Ideal Accident Report and other tools to collect data
  - Indicators used to monitor safety and operation
- Infrastructure and design
  - Pedestrians crossings, Roundabouts and Road Junctions, Stops and Stations, Running sections. Each interaction point will present some success stories.

## Participating countries

AT, BE, CH, CZ, DE, ES, FR, HU, IE, IL, IT, NL, PL, PT, UK

## Contact details

### Chair of the Action

FONTAINE Laetitia  
Tramway specialist  
STRMTG, France  
laetitia.fontaine@developpement-durable.gouv.fr

### Science Officer

PERO Mickael,  
Science Officer  
Transport and Urban Development  
COST Office  
mickael.pero@cost.eu
